

Subject: Lamar Soutter Library Renovation Project and Study Carrels

September 6, 2019

Dear Students,

As you know, the initial moving has been initiated in the library. This consists of removing stacks of books, and this is to be done during main working hours. I understand that this is a difficult and disruptive situation for our students, and I want to remind you that the library is offering earplugs and noise cancelling headphones for students during this time. In addition, I am working with the Dean on identifying additional available study spaces for your use during this (approximately) 2 week period. The next phase of construction (carpeting, new carrels) will largely be completed after regular working hours.

As you know, this work in the library will greatly enhance your overall experiences, and I am hopeful that we can get the work completed as expeditiously as possible! Please feel free to reach out to me personally if you have additional questions and concerns.

Thank you!

Anne Campbell Larkin, MD, FACS
